

Motion to Ban Use of Computers in UWCS by 2030

Proposer: Samuel Chee (2014031)

Seconded: Ivan Kudryavtsev (2000646)

The society notes:

1. Computers are widely used across all members of UWCS and DCS.
2. Computers use electricity, which negatively contributes to climate-change.
3. The University pledges to go net-zero by 2030.
4. DCS currently does not have any active campaigns to increase sustainability or reduce emissions.

The society believes:

1. Climate-change is bad, and we need to do our part to reduce our emissions
2. It would only be right if UWCS do it's part in helping the University achieve net-zero by 2030.
3. The Computer Science course is mainly theoretical, and therefore does not actually require computers to teach the necessary content.

The society resolves:

1. Pledge and make active steps towards having a computer-free UWCS and to ban computers by 2030
2. Actively pressure DCS to do the same and remove all computers from the DCS building and ban students and staff from using them by 2030.
