

# Motion to document all motions

**Proposer:** Kunal Shah 2054163

**Seconder:** Skiros Habib 2041635

## **The society notes:**

1. Non-constitutionally changing motions currently do not have a central record.

## **The society believes:**

1. All motions should be stored in a central location with a copy of their voting outcome.

## **The society resolves:**

1. Provide a central repository of all motions (hosted by the society) containing a record of motions, the date of motion, and the outcome of the vote.
2. Create a new article in the constitution stating

“All motions proposed during a general meeting should have a copy made of and stored in a repository for at least 5 years after date of proposal. This should be stored alongside a) its date of proposal and b) the outcome of its vote.

All motions and additional information in the above repository should be made accessible to all members of the society”
